EduTutor

Connecting students with Tutors

Problem Statement

Due to COVID, school students may be unable to seek extra guidance from teachers at school.

Therefore the app can find a tutor for the student that best fits the need and help in academics.

Moreover, the sessions are paced according to the students need.

The parents can get live updates from the tutor about tests and performance

About the product

Our website connects students with tutor, matched based on the student's profile, skill test and requirements

Student can access following features-

1. Book a tutor to strengthen their concepts on particular subject or topic
2. Book a Tutor to get help for doubt solving
3. A student can just practice few questions on concepts to have a better understanding

Additional features-

1. Tutor can prepare quizzes which can directly be used by students to give skill test or practice questions
2. Student takes skill test for the subject whose results will be displayed directly to assigned tutors
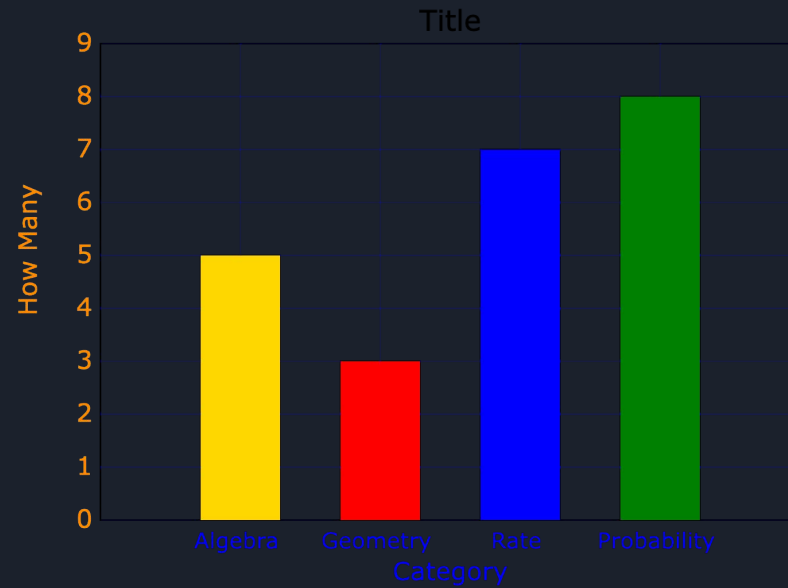

Revenue Model

1. Subscription Based: Students pay a basic subscription fee to get the services offered by the app. The basic subscription allows the student to ask doubts and solve problem questions
2. Personal Tutor Subscription: Students pay an additional fee to receive live sessions from tutors that fit their needs
3. The tutors get paid on an hourly basis based on the services they offer. The services vary from creating problem questions and solutions to providing live sessions to studens
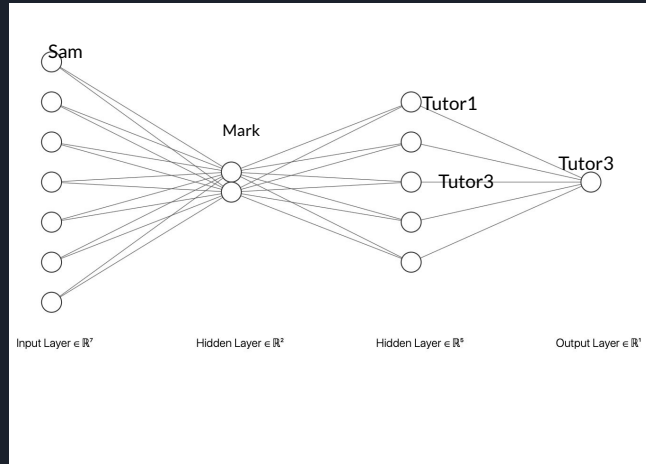

Tutor's Dashboard

Student's performance in Maths-

How we assign Tutor to student?

Student will provide- personal information, information on topics they want to learn and timings, data about their understanding of the topic by taking skill tests.

Based on information obtained from previous students and their review on tutors, we will match the student with the tutor that best fits their learning methodology using machine learning.
